Triumphont success of
BUCHIN'S BURGARIAN BALASH OF LIFE.
The Great English Beneity for Colde, Caughs,
Ashime and Consessation.

THE most celebrated and infallible remedy for
for coughs, colde, asthma, or any form of pulmonary consumption, is the Hungarian Balsam of
late, discovered by Dr. Buchan of London, Eng.
tested for upwards of severy years in Great Britain,
and on the continent of Europe, and introduced into the United States under the immediate superintendence of the inventor.

The astonishing success of the Hungarian Balsam
in the curs of every form of consumption, warrants
the American Agent in soliciting for treatment the
worst possible cases that can be found in the community—cases that reck relief in vain from any of
the common remedies of the day, and have been
given up by the most distinguished Physiciana as
confirmed and incurable. The Hungarian Balsam
has cured and will cure, the most desperate of cases,
it is no quack soutrum but a standard Regists medcione, of known and established officacy.

Every family in the United States should be suppiled with Buchan's Balsam of Life, not only to
counteract the consumptive tendencies of the climate, but to be used as a preventive medicine in all
passes of colds, coughs, spitting of blood, pain in the
side and chest stritution and soreness of the lungs,
brought sweats. Eunociation, and general debility,
night sweats. Eunociation, and general debility,
Astuma, influenza, wheoping cough, and croup.

In case of actual disease of the lungs, or scated
consumption, it is the only source off hope.

ALL-HEALING CIMTMENT.

TIPE preceeding figure is given to repre-sent the Insensible Perspiration. It is the great reacuation for the impurities of the body. It will be noticed that a thick cloudy mist resice from all points of the surface. which indicates that this perspiration flav uninterruptedly when we are in health, but ceases when we are sick. Life cannot be susteined without it. It is thrown off from the bleed and other juices of the body, and disposes by this means, of nearly all the impurities within us. The language of Scripture is, "the blood is the life." If it ever benomes impure, it may be traced directly Thus we see, all that is necessary when the lood is stagnant, or infected, is to open the pores, and it relieves itself from all impurity ficient, without one particle of medicine, except to open the pores upon the surface -Thus we see the folly of taking so much internal remedies. All gracitioners, however direct their efforts to restore the insensible peripiration. The Thomsonian, for instance steams, the Hydropathist abrouds us in wet blankets, the Homopathist deals out infinite-simals, the Allopathist bleeds and dosess us with mercury, and the blustering Quack

hores us with pills, pills, pills. To give some idea of the amount of the aseasible perspiration, we will state that the learned Dr. Lewenbock, narestained that five-eights of all we receive in the stomach present off by this means. In other words, if we gat and drink eight pounds per day, we evacuate five pounds of it by the insensible

This is none other than the used up particles of the blood, and other juices giving place to the new and fresh ones. To check this, therefore, is to retain in the system five eights of all the virulent matter that nature

domands should leave the body.

By a sudden transition from heat to cold, the pores are stopped, the perspiration ceases, and discuse begids at once to develope itself. Hence, a stoppage of this flow of the juices, originates so many complaints. Nine centies of the whole die from diseases induced

y a stoppage of the insensible perspiration. Let me ask, now, every candid mind, what course seems the most reasonable to pursue, to unstop the pores, efter they are closed.— Would you give physic to unstop the pores! Or would you apply something that would do this upon the source, where the clogging ac-tually is 1. And yet 1 know of no physicism who makes any external application to effect it. Under these circumstances, I present to physicians, and to all others. Messrs Sands—In the Spring of 1841 I had the typhus fever, with which I suffered the most intense pain, and when I recovered from that I was attacked with the spinal complaint and inflamed sore throat. This continued until June, 1843, when my throat and lungs ulcerated, attended with a severe cough, and my face was covered with scro-fulous sores. I cannot describe what I suffered for five years, three of which I was confined to my bed and could not set up at During this period I received no bezefrom the various prescriptions of different Physicians, and had nearly given up all hapes of ever being any better. At this time I was induced to try your Sarasparills, from the many remarkable cures it had performed, and strange as it may spear, the fits bottle effected a sensible change. By continuing its one my health has so much improved that I can now not only ait up, but walk, and I fully believe, with the blessing of Providence, that it will affect a perfect cure.

A. B. & D. Sands: Gents.—A man near here used six bottles of your valuable Sarsaparilla for the Largosy, and has received me a benefit from it than all other remedies combined for six years past. It restored a hand, leg and foot from a aituation that no person would have known that they belonged to a human body, as all appeared to be one mass of putrifying sore. Mesers Sands: I have been afflicted with severe pain in my side, occasioned by a diseased liver, for the last twenty years; suf fering at times what language canno convey but since taking your Sersaparille I have been greatly relieved so much so that I have been able to attend to my business, and months. I wholly discarded all other medicine, and thoroughly tried the Sarsaparilia, which I can recommend in truth and sincerity to all those who are in any way afflicted with any species of scrofulous complaints. There have been some remarkable cures of fected by its use in this vicinity. Mrs I.
